

TRUCK RESTRAINT

METRO DOCK ELECTRIC HOOK RESTRAINT

The Metro Dock Electric Hook Restraint is face of wall mounted and uses a floating head which allows for continued pressure on the ICC bar, adjusting to any trailer movements. An eco-friendly alternative to the Hydraulic Truck Restraint, the Electric Hook Restraint is electrically operated with the aid of a complete interior and exterior communication package.

Key Features and Benefits:

- Floating head self-adjusting to various heights
- 32,000 lbs. restraining strength
- Interior/ Exterior LED communication package
- Zinc plated to resist corrosion
